

OUR STORY

Trolley and Cart was established in 1995 as a professional manufacturer of mobile hospitality equipment. Over the years, we recognized that there was a greater need for mobile equipment to not only be produced to the highest quality but also be aesthetical, cost-effective, sustainable and multifunctional. This notion drove us to set up TC Design Studio in 2017. By overseeing the entire process from the initial design through to final production, we invest heavily in research and develop new solutions that is able to offer great value-sourcing sustainable materials, building energy-efficient product ranges, exploring space-saving design and many other innovation possibilities. By partnering with international suppliers and distributors, Trolley and Cart is constantly looking for new and better ways forward. We adopt a consultative approach with our customers and collaborate with industry professionals in catering, hospitality and F&B to drive innovation forward and build for the future.

F O O D & B E V E R A G E

F L E X

FLEX created the most recognizable images of buffet station and facilitate this idea to F&B industry. FLEX will be featured in TC new station collection presented in 2022.

D E L U X E

As TC signature design, Deluxe is always chef's first choice. TC choose #304 stainless steel to form Deluxe, which created Deluxe unique durability and stable performance.

D E L U X E L I T E

The very first idea came to us when designing Deluxe Lite is making it as multipurpose as we can. We found out a lot of mobile stations are not easily maneuver, some even come without casters. High mobility built our very first design idea of Deluxe Lite. By partly using aluminum in this station body, Deluxe Lite achieved a good balance point between stability and maneuverability. It perfectly present most features of Deluxe while keep its own personality.

M I N I S T A T I O N

Change means we see the world in different perspective, change also challenge the world to accept new ideas. As we build up MINI Station, we face this challenge frequently. MINI Station perfectly match all TC Stations, we invite you to join us for the Journey of Change.

MOBILE STATION COLLECTION

As an agitator, designer, and theorist, TC work fearlessly to explore the boundary between creativity and adaptability.

From kitchen to ballroom, live cooking to catering, we are inspired by the idea of providing mobile F&B service with food trucks and buffet stations.

After 5 years and thousands of testing, we present you our TC Mobile Station Collection Deluxe which is the Deluxe Lite, FLEX and MINI Station. These are the dynamic union of mobile stations with the maximum connection of function and aesthetics.

Overloading Protection

IOA/16A Earth-leakage circuit breaker are added extra protection against the risk of electric shock. It instantly cuts the power in the event of an earth connection leakage.

Color Selection

Color is the initial impression of each product. The visual texture largely determine our feeling of products. Sometimes aesthetic is under the light and reflection. By choosing different panel colors, textured finishes and different frames, you can give each mobile station its own character.

ONE SERVICE TROLLEY SYSTEM

Service Trolley is underrated. TC face the challenge by re-formulating trolley's role in F&B operation. This versatile trolley is not used only as a food and wine display but can be converted to many other usages such as a mini bar to food warmer. With our Module System-T design, ONE trolley diversified into a multipurpose cart.

ALPHA HOUSEKEEPING SYSTEM

This system aims to improve efficiency and manage the internal logistic challenges in housekeeping operation. It includes Alpha HK cart, Auxil cart and BOH station. With optimal storage spaces design, Alpha can load all house keeping essentials: bedding, linen, vacuum, amenities, glasses, garbage can, cleaning tools etc. Auxil cart is preloaded with a rechargable battery and automatic following system to follow Alpha cart for material supplies. BOH Station is used for storing all marterials in ToGo drawers, those modular drawers is designed to aim fast loading, effort saving and easy organization.

HTADIL

Size: 1930/1590 × W510 × H1200mm

ALPHA HOUSEKEEPING SYSTEM

For maximum space advantage, we designed the special range of compartments on top of a drawer in Alpha cart for amenities with a roll-up door. Standard 3 shelves are perfect for clean linens. Dirty linens go to one side of the removable waterproof linen bag. Another side is a smaller bag which can be used for collecting garbage, beneath space for vacuum or other cleaning equipment. And last but not least a rack holder is installed at bottom of the cart to store glasses and cups.

Alpha - M Auxi

HTAMA01

Size: 1870xW540xH1570mm

As a partner of Alpha, Auxi was designed with big loading capacity for linen, amenities, drinks etc. Usually loaded carts are heavy to push, but we empower the Auxi cart with a rechargeable battery, electric wheel with brakes and a automatic following system. Auxi follow Alpha without pushing, that drives logistic and operational efficiency up and save efforts. As a result, Auxi make housekeeping as easy as possible.
