

A close-up photograph of a hand holding a silver spoon over a white bowl filled with tomato soup. The spoon is tilted, and a small amount of soup is dripping from it. The bowl is placed on a white saucer, which is on a wooden table with a yellow napkin. The background is slightly blurred, showing a white plate and a knife.

STATEMENT OF CONFORMITY

As pioneers in eco-design and experts in bamboo since our launch in 2003, we are constantly on the forefront of innovation in design and manufacture of bamboo fibre tableware and home accessories.

Our signature BIOBU® eco-composite is described as a biopolymer, which means it is comprised of about 50% bamboo fibre, a highly renewable material, and 50% non-toxic food-grade A5 melamine binder, which makes it durable and reusable. Our bamboo fibre is responsibly-sourced sawdust which is collected as waste from select bamboo chopstick factories.

We manufacture our custom-designed products with an exclusive partner. Our factory is not only BSCI-compliant in social responsibility, but we work together with our factory, never cutting corners, to manufacture the safest and most premium bamboo fibre goods on the market.

Our material is stable and unchanging and poses absolutely no health risk with normal daily use. Our products are tested regularly at the factory, and undergo independent testing in Europe.

All EKOBO products comply to all food safety standards around the world (FDA, LFGB & REACH) and are free of BPA, PVC, Phthalates, Lead, Cadmium and Mercury.

NOTE: Our BIOBU® Eco-Composite products are made with natural materials; slight color imperfections or inconsistencies may occur. Our "white" is an off-white as it is the natural color of bamboo.

While our products are durable and long-lasting, this eco-friendly material is not unbreakable. It will not shatter like ceramic or glass, but if dropped at a bad angle on a hard floor, a chip or crack may occur.
